Weather Key Points - Heat/Fire

Regional Operations Center

Western Region

Friday, September 9

- One more day of dangerous, record-breaking heat is expected Friday, before notably cooler conditions return statewide beginning Saturday and persisting through next week
 - Temperatures across much of the Central Valley will again reach the 105-113°F range, with inland southern California also seeing widespread readings in the upper 90s to lower 100s.
 - Very warm temperatures well into the 80s and 90s will also be seen across northern and southern coastal areas
 - High to very high heat impacts will be widespread once again, with significantly reduced heat impacts likely for the weekend and much of next week
 - Some moderate heat risk concerns will linger across far northern California on Saturday with temperatures holding in the 80s and 90s before cooling further on Sunday
 - Cooler temperatures are expected across the state into the weekend and continuing through next week
- Fire weather conditions will also remain highly elevated to locally critical for much of the state through Friday evening, particularly in and around the mountains and foothills and across much of southern California due to increasingly strong east winds.
 - Any new or existing fires may spread quickly with the expected conditions.

Weather Key Points - Kay

Regional Operations Center

Western Region

Friday, September 9

- Tropical Storm Kay will remain offshore of the Baja California peninsula, recurving out to sea through early next week but bringing both increasing east winds and moisture to much of southern California later Friday and Saturday. **Note that this tropical weather system will NOT make a direct landfall in southern California but is still expected to bring some significant impacts.**
 - East winds will increase over much of southern California Friday into early Saturday, with speeds of 25 to 40 mph and gusts of 45 to locally 65+ mph, highest in the mountains and mountain gaps favored by east winds. Some localized gusts over the higher peaks may reach or exceed 80 mph.
 - Periods of showers and thunderstorms will also increase across southern areas of the state Friday into Saturday, bringing heavy rainfall at times.
 - Total rainfall amounts of ½ to 1 inch are expected for many desert and coastal areas, with amounts of 2 to locally 5 inches across the Peninsular Ranges.
 - These amounts may be sufficient to produce flash flooding, especially in and around new and recent burn scars.
- **The burn scars of most concern are the Apple, Bobcat, Bond, El Dorado, Fish, Gulch, Lake, and Route Fires as well as the ongoing Radford and Fairview Fires**

2022 May Monkeypox Virus

On 08/01/22, the Governor proclaimed a State of Emergency to support the State's response to Monkeypox. A copy of the proclamation can be found [here](#).

The California Department of Public Health (CDPH) has activated the Medical and Health Coordination Center (MHCC) at Level 3 (low) in response to the 2022 May Monkeypox Virus event on 05/24/22; and increased the activation to Level 2 on 07/18/22.

- Hours of Operation: Monday to Friday, 0800 hours to 1700 hours until further notice.

2022 September Heat Wave

On 08/31/2022 California moved into Phase II of the Extreme Temperature Response Plan due to the upcoming 2022 September Heat Wave.

- Phase II actions are taken because of credible predictions by the NWS of excessive heat, cold, or of power disruptions during abnormal weather conditions. During this phase, contact with local agencies and coordination among state agencies increases.
 - Extreme Temperature Response Plan link [here](#).
- Governor Gavin Newsom has proclaimed a State of Emergency to temporarily increase energy production and reduce demand. Link to the proclamation can be found [here](#).
- Please see the attached Situation Summary for information regarding the 2022 September Heat Wave.
